Dear Friends:

As a 91-year-old retired Minister of the Gospel-- I am not so young but I remember the old Windmills we used to see dotting our farms! Today, it is almost impossible to see one again. I miss the atmosphere of those old days and the reminders I receive now with one of your wind Generators rEcent.y installed just next to my property! I love to see the huge arms turning and w hen the shadows of the arms f all on my side of the fence, I am glad. Besides all that- this spells progress- and you good people are doing something to assist mankind reduce our living costs!

A few years ago , with my late son, wwe visited Holland and saw the wind-mills turning- It was just the way I would always want it to be.

In another century f ollowing the Paris World's Fair- some people wanted the great landmark removed. Better wisdom prevailed- and Paris would nto be Pa ris without the Eifel Tower! I havE stood at the top of it- lookingdown hundreds of feet to the River below!

To know that I willl be financially benefeited by this new wind development is just like the cherry on the icecream!

God bLess you in your work. Installing the tower and watching it all go up -has only been joy for this old guy!

I have written for the local paper for more than 13 years! Enclosed, some of my latest stuff!

JOY!

Pastot Dick Renteria
